

Gerardo Nastri

Full stack developer

About me

I am a full-stack developer specializing in web and mobile solutions. Currently, I focus on building web applications using Next.js, TypeScript, and Tailwind CSS, and mobile apps with Expo and React Native. For backend development, I primarily work with Node.js, delivering efficient and scalable solutions.

- Git

Experience

2022 - NOW

Freelance fullstack developer

I am a full-stack web and mobile developer with expertise in building modern applications. For web development, I use React, TypeScript, Next.js, Node.js, MongoDB, PostgreSQL, Stripe, and Framer Motion to create dynamic and scalable websites.

On the mobile side, I specialize in Expo and React Native to deliver high-quality cross-platform apps.

Additionally, I have proficiency in Python, Java, and C, broadening my problem-solving and development capabilities.

Projects

I developed a full-stack basketball team website using Next.js and Tailwind CSS, featuring search functionality, an admin dashboard for managing content, and secure user authentication with NextAuth and JSON Web Tokens. The site is optimized for performance with Server-Side Rendering, fully responsive across devices, and achieves a perfect SEO score of 100. Technologies used include MongoDB, Firebase, Framer Motion, and Vercel.
